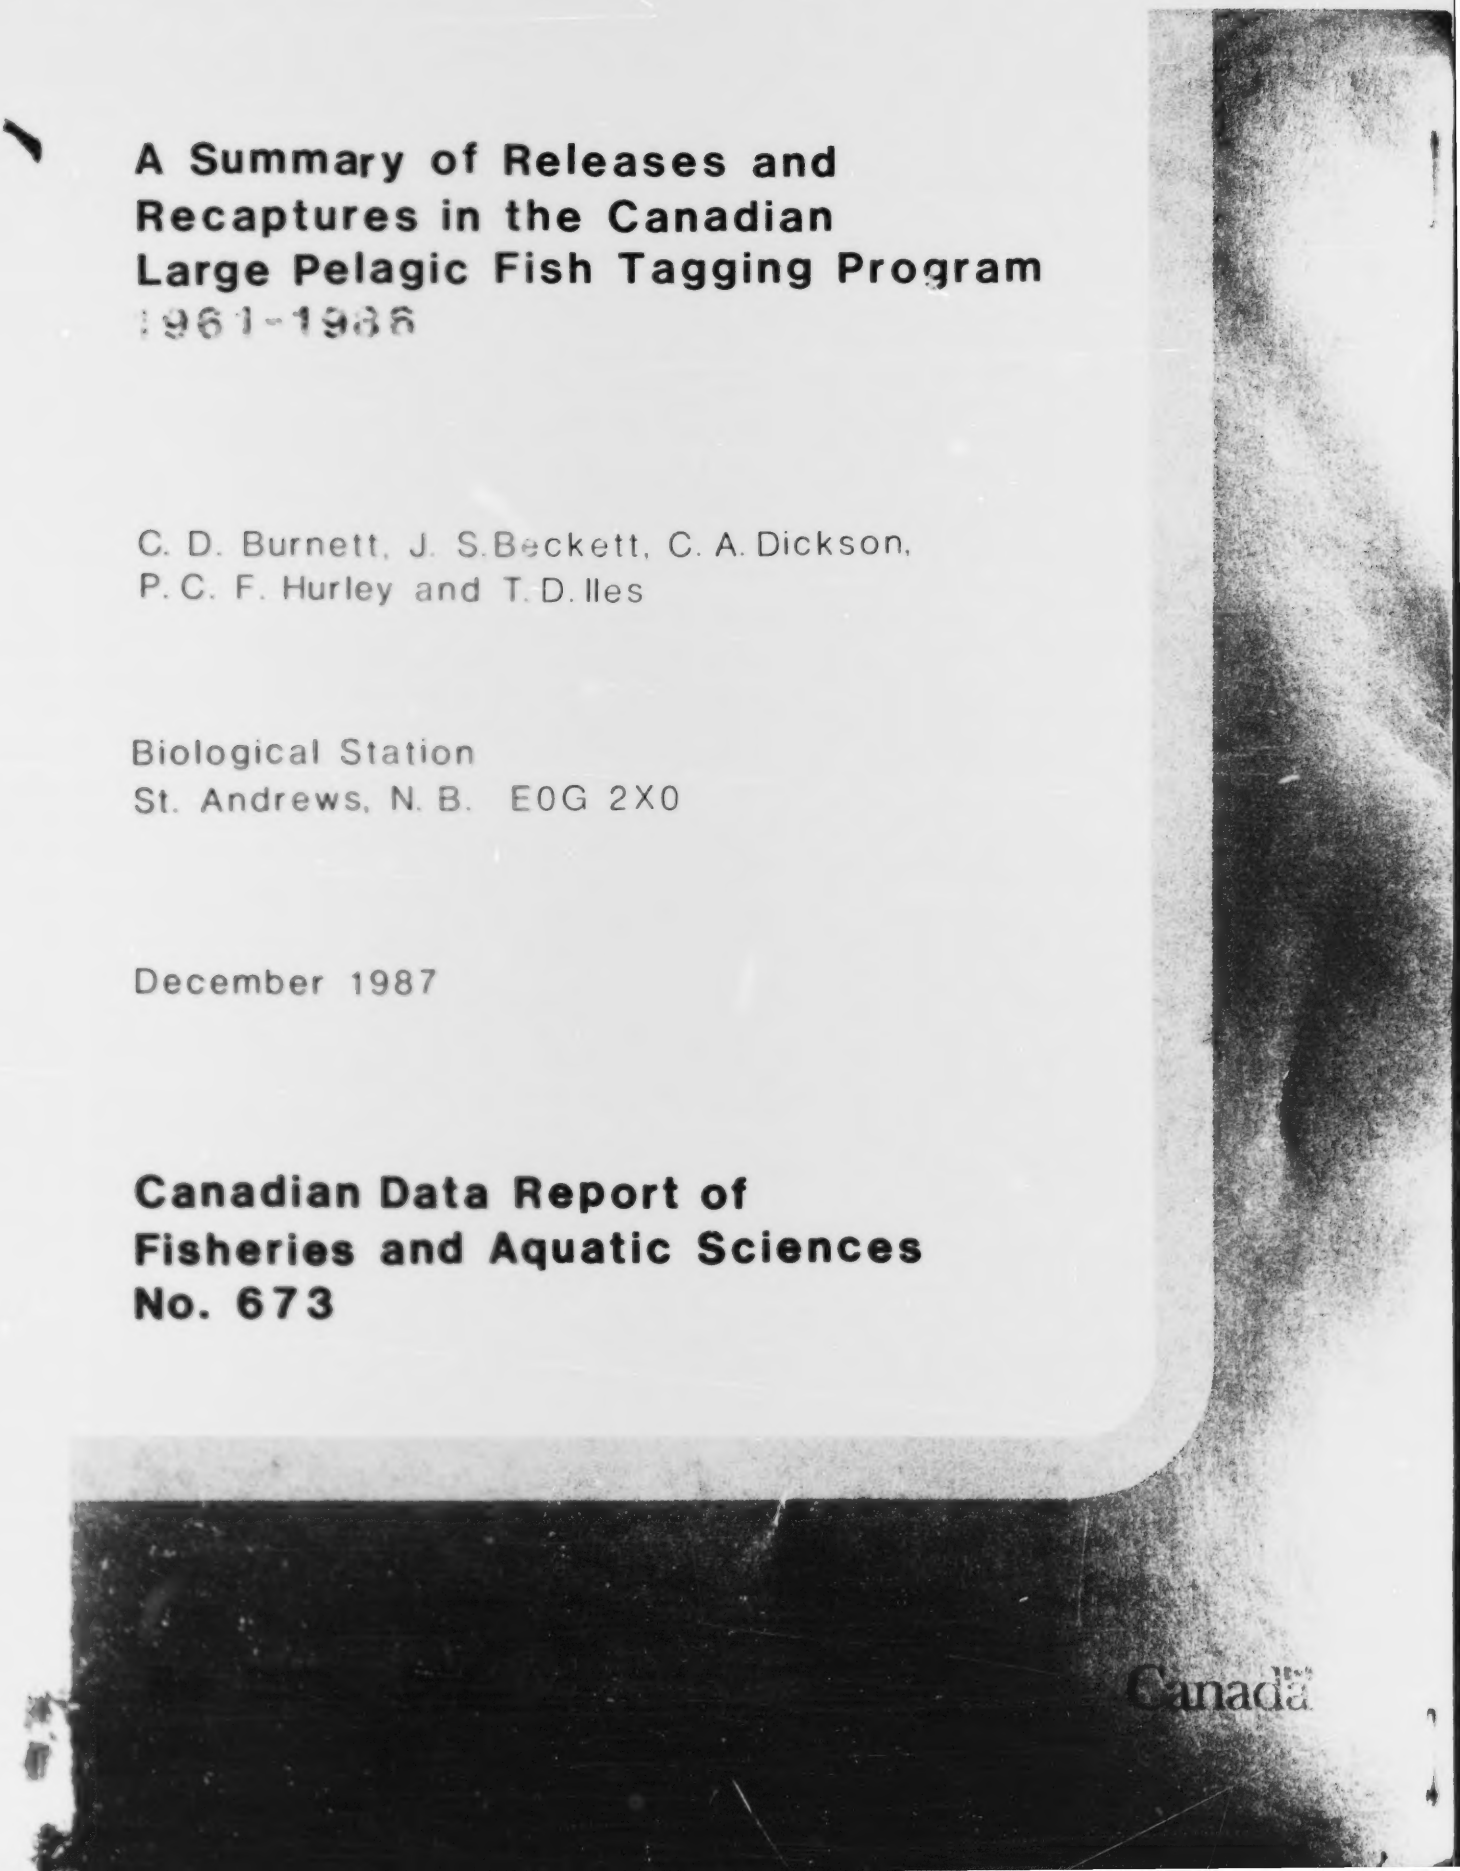
Canadian Data Report of Fisheries and Aquatic Sciences No. 673



88-02187/

Canadian Data Report of Fisheries and Aquatic Sciences

Data reports provide a medium for filing and archiving data compilations where little or no analysis is included. Such compilations commonly will have been prepared in support of other journal publications or reports. The subject matter of data reports reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries and aquatic sciences.

Data reports are not intended for general distribution and the contents must not be referred to in other publications without prior written authorization from the issuing establishment. The correct citation appears above the abstract of each report. Data reports are abstracted in *Aquatic Sciences and Fisheries Abstracts* and indexed in the Department's annual index to scientific and technical publications.

Numbers 1–25 in this series were issued as Fisheries and Marine Service Data Records. Numbers 26–160 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Data Reports. The current series name was introduced with the publication of report number 161.

Data reports are produced regionally but are numbered nationally. Requests for individual reports will be filled by the issuing establishment listed on the front cover and title page. Out-of-stock reports will be supplied for a fee by commercial agents.

Rapport statistique canadien des sciences halieutiques et aquatiques

Les rapports statistiques servent à classer et à archiver les compilations de données pour lesquelles il y a peu ou point d'analyse. Ces compilations auront d'ordinaire été préparées à l'appui d'autres publications ou rapports. Les sujets des rapports statistiques reflètent la vaste gamme des intérêts et des politiques du ministère des Pêches et des Océans, c'est-à-dire les sciences halieutiques et aquatiques.

Les rapports statistiques ne sont pas destinés à une vaste distribution et leur contenu ne doit pas être mentionné dans une publication sans autorisation écrite préalable de l'établissement auteur. Le titre exact paraît au-dessus du résumé de chaque rapport. Les rapports statistiques sont résumés dans la revue *Résumés des sciences aquatiques et halieutiques*, et ils sont classés dans l'index annuel des publications scientifiques et techniques du Ministère.

Les numéros 1 à 25 de cette série ont été publiés à titre de relevés statistiques, Services des pêches et de la mer. Les numéros 26 à 160 ont été publiés à titre de rapports statistiques du Service des pêches et de la mer, ministère des Pêches et de l'Environnement. Le nom actuel de la série a été établi lors de la parution du numéro 161.

Les rapports statistiques sont produits à l'échelon régional, mais numérotés à l'échelon national. Les demandes de rapports seront satisfaites par l'établissement auteur dont le nom figure sur la couverture et la page du titre. Les rapports épuisés seront fournis contre rétribution par des agents commerciaux.

ABSTRACT

C. D. Burnett, J. S. Beckett, C. A. Dickson, P. C. F. Hurley, and T. D. Iles. 1987. A summary of releases and recaptures of the Canadian large pelagic fish tagging program 1961-1986. Can. Data Rep. Fish. Aquat. Sci. 673: iii + 99 p.

An extensive tagging program was undertaken on large pelagic fishes (particularly tunas, swordfish and sharks) between 1961 and 1982. This report provides details of all (5211) releases and of the 242 recaptures between 1961 and 1985.

RÉSUMÉ

C. D. Burnett, J. S. Beckett, C. A. Dickson, P. C. F. Hurley, and T. D. Iles. 1987. A summary of releases and recaptures of the Canadian large pelagic fish tagging program 1961-1986. Can. Data Rep. Fish. Aquat. Sci. 673: iii + 99 p.

Un programme de marquage considérable a été entrepris sur les gros poissons pélagiques (en particulier sur le thon, l'espadon et le requin) entre les années 1961 et 1982. Ce rapport fourni les détails concernant toutes les espèces libérées (au nombre de 5211) ainsi que les 242 recaptures entre les années 1961 et 1985.

INTRODUCTION

An extensive tagging program has been undertaken from the Biological Station, St. Andrews, N.B. (Department of Fisheries and Oceans) on large pelagic fishes (particularly tunas, swordfish and sharks) since 1961. In total, 5211 fish were tagged and released over the period 1961 to 1982. Although tagged fish are still captured occasionally, the rate of tag returns is now minimal and the program can be considered nearly complete. The purpose of this document is to compile all of the release and recapture information from this 25-yr program. It updates previous reports by Beckett (1970), Burnett et al. (1976) and Hurley et al. (1978).

METHODS

Five types of dart tag were used in the study (Fig. 1). The FM61 and FT1A tags (Mather 1963) had plastic darts (double and single barbs, respectively) attached to yellow spaghetti tubing. The Woods Hole Oceanographic Institution (WHOI) tags all had a stainless steel dart with either nylon filament ("H" and "M" types) or spaghetti tubing ("C" type) attached (Mather 1963, Beckett 1970). The spaghetti tubing was clenched to the dart while the nylon filament was threaded through a hole in the dart and held in place either by beading it with heat (WHOI version) or by spreading the end under pressure (FRB modification) (Beckett 1970). The monofilament tags carried either a length of yellow spaghetti tubing ("H" type) or a screw-capped capsule ("M" type).

Messages, including notice of rewards ($5 or $10) and serial numbers were printed on the plastic spaghetti tubing or on a plastic film rolled up inside the capsule. The capsule ("M") tags were obtained from H. C. Phillips Ltd., and the messages from Pilgrim Plastics Ltd. All other tags were supplied by Floy Tag and Manufacturing, Inc.

Fish were captured for tagging by a variety of methods, including: tuna purse-seining, pelagic longlining, fish traps and angling. In addition, some free-swimming fish were tagged using an especially adapted harpoon.

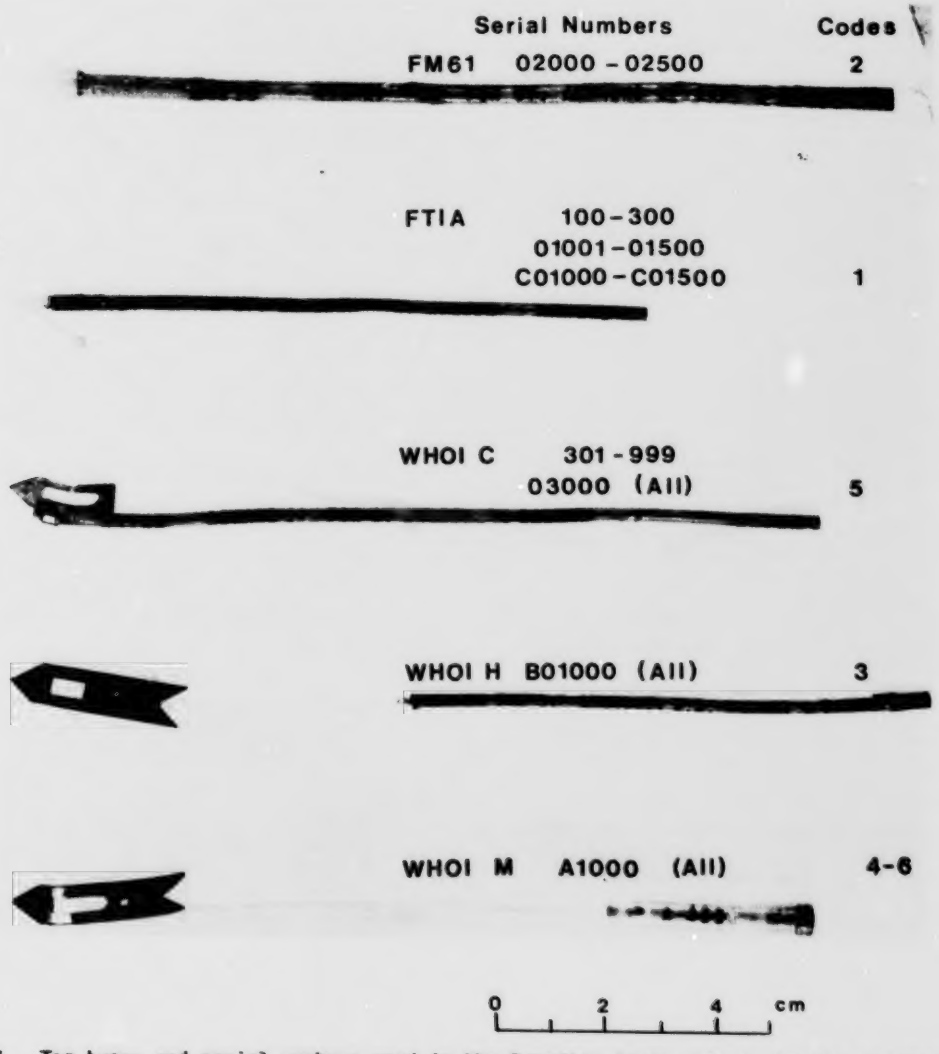

Fig. 1. Tag types and serial numbers used in the Canadian large pelagic tagging program.

Tagging has been previously described by Beckett (1970):

> Tags were inserted in the fish either with a hollow needle (FT1A and FM61) or on the end of steel pins (metal dart types), both of which could be mounted at the end of a long pole (Mather 1963).
>
> When tagging fish captured by hook and line (longline or angling), they were pulled close to the boat and a tag inserted as near to the mid-point of the mid-dorsal line as possible. Once the tag was in place the line was cut close to the fish without removing the hook. This left the hook in the fish, together with a length of nylon line and, often, a short stainless steel wire leader. It is thought that this caused little harm and that the hook rusted away quite rapidly. The fish were not lifted from the water and it was therefore only possible to obtain an estimate of the length and weight. A cradle was constructed to lift the fish on board for measuring, but it proved very awkward and, except in calm weather, almost impossible to use.
>
> Purse-seined fish were scooped from the seine with a dipnet. They were laid on a metre rule with the snout against a block, measured, tagged, and returned to the water in a matter of seconds. Some larger tuna were tagged in the dipnet and guided out of the seine without being lifted completely from the water.
>
> The only fish tagged from fish traps were very large (over 400 lb) bluefin tuna. The fish were tagged as they swam around in the trap, where their behaviour in keeping close to the walls facilitated the process. Usually, however, it was necessary to raise the floor of the trap to bring the fish close to the surface. When most or all of the fish were tagged, a side of the trap was sunk and the fish allowed to swim out. They did not appear to be greatly excited by this process and left the trap and the immediate vicinity quite slowly, without signs of panic or distress.

Most of the tags were applied by Department personnel on research cruises (usually chartered commercial vessels) or observers on commercial vessels (tuna purse seiners, etc.). Some were applied by the crew of commercial vessels or traps.

Recaptures were all from the commercial and sport fisheries.

RESULTS

DATA FORMAT

Two tables of data have been compiled. Releases are listed in Table 2, by year and species. Details include date and location of release for each tag, the gear the fish was released from, as well as information on length, weight, and sex (when known). Recaptures are listed (by species) in Table 3, along with relevant release information and a calculation of time at large and linear distance between release and recapture locations.

The data contained in this report are available in computer readable format from Marine Fish Division, Dept. of Fisheries and Oceans, Biological Station, St. Andrews, N.B.

ACKNOWLEDGMENTS

Over the quarter century that this program operated, a great many people assisted both with tagging and in recovery of tags. We particularly acknowledge officers and crew of research, charter, and commercial vessels which were involved in the study. We thank R. L. Stephenson for his encouragement and help for the completion of this report. We thank Dr. W. B. Scott for advice on nomenclature, and Barbara Garnett and Jeanine Hurley for typing this report.

Table 1. Summary of species tagged and recaptured in the Canadian large pelagic fish tagging program, 1961-1984. Terminology follows Collette and Nauen (1983), Compagno (1984), and Robins et al. (1980).

	No. tagged	No. recaptured
Alopiidae - thresher sharks		
Alopias superciliosus . . . . bigeye thresher	1	
Lamnidae - mackerel sharks	11	
Cetorhinus maximus . . . . . basking shark	2	
Isurus oxyrinchus . . . . . shortfin mako	110	5
Lamna nasus . . . . . porbeagle	8	
Carcharhinidae - sharks	18	
Carcharhinus falciformis . . silky shark	74	
Carcharhinus longimanus . . oceanic whitetip	73	
Carcharhinus obscurus . . . dusky shark	80	1
Carcharhinus plumbeus . . . sandbar shark	34	1
Carcharhinus signatus . . . night shark	5	
Galeocerdo cuvieri . . . . . tiger shark	18	1
Prionace glauca . . . . . blue shark	2003	17
Rhizoprionodon terraenovae . Atlantic sharpnose	1	
Sphyrnidae - hammerhead sharks	16	
Sphyrna lewini . . . . . scalloped hammerhead	60	
Dasyatidae - stingrays		
Dasyatis violacea . . . . . pelagic stingray	6	
Mobulidae - mantas		
Manta birostris . . . . . Atlantic manta	1	
Alepisauridae - lancetfishes		
Alepisaurus ferox . . . . . longnose lancetfish	2	
Coryphaenidae - dolphins		
Coryphaena hippurus . . . . dolphin	35	
Gempylidae - snake mackerels		
Lepidocybium flavobrunneum . escolar (?)	1	
Ruvettus pretiosus . . . . . oilfish	1	
Scombridae - mackerels		
Acanthocybium solanderi . . wahoo	3	
Auxis thazard . . . . . frigate mackerel	4	
Euthynnus alletteratus . . . little tunny	17	
Euthynnus pelamis . . . . . skipjack tuna	132	4
Sarda sarda . . . . . Atlantic bonito	4	
Thunnus albacares . . . . . yellowfin tuna	465	4
Thunnus obesus . . . . . bigeye tuna	22	
Thunnus thynnus . . . . . bluefin tuna	1615	182
Thunnus sp. . . . . tuna	5	
Thunnus sp. & *Euthynnus* sp..	57	
Xiphiidae - swordfishes		
Xiphias gladius . . . . . swordfish	294	25
Istiophoridae - billfishes		
Tetrapturus albidus . . . . . white marlin	2	
Molidae - molas		
Mola mola . . . . . ocean sunfish	28	
Chelonidae - sea turtles		
Caretta caretta . . . . . Atlantic loggerhead	2	1
Dermochelyidae - leatherback turtles		
Dermochelys coriacea . . . . Atlantic leatherback	1	
Totals	5211	242

Table 2. Details of releases by year and species in the Canadian large pelagic fish tagging program; 1961-1985. Tag types are given in Fig. 1. Gear codes are as follows; HL = handline, LL = longline, HP = harpoon, TR = trap, PS = purse seine, RR = rod and reel, UNK = unknown.
